DEQ - Hazardous Waste Program Hazardous Waste Annual Report Form Code Group

Form codes describe the general physical and chemical characteristics of a hazardous waste. Review the groups and pick the appropriate code for use on the Generation & Management (GM) Form or the Waste Received (WR) Form.

Mixed Media/Debris/Devices - Waste that is a mixture of organic and inorganic wastes, liquid and solid wastes, or devices that are not easily categorized Code **Form Code Description** W001 Lab packs from any source not containing acute hazardous waste Contaminated debris (see definition at 40 CFR 268.2(g) and requirements at 40 CFR 268.45); for example, certain paper, clothing, rags, wood, W002 empty fiber or plastic containers, glass, piping, or other solids Lab packs from any source containing acute hazardous waste W004 W005 Waste Pharmaceuticals managed as hazardous waste W006 Airbag waste (airbag modules or airbag inflators managed as haz waste) Contaminated soil (usually from spill clean-up, demolition, or remediation); W301 see also W512 W309 Batteries, battery parts, cores, casings (lead-acid or other types) Filters, solid adsorbents, ion exchange resins and spent carbon (usually W310 from production, intermittent processes, or remediation) Electrical devices (lamps, fluorescent lamps, or thermostats usually containing mercury; CRTs containing lead; etc.) W320 Sediment or lagoon dragout, drilling or other muds (wet or muddy soils); W512 see also W301 W801 Compressed gases of any type Inorganic Liquids - Waste that is primarily inorganic and highly fluid (e.g., aqueous), with low suspended inorganic solids and low organic content Code **Form Code Description** Very dilute aqueous waste containing more than 99% water (land disposal restriction defined wastewater that is not exempt under NPDES or POTW W101 discharge) W103 Spent concentrated acid (5% or more) W105 Acidic aqueous wastes less than 5% acid (diluted but pH<2) W107 Aqueous waste containing cyanides (generally caustic) W110 Caustic aqueous waste without cyanides (pH>12.5) W113 Other aqueous waste or wastewaters (fluid but not sludge) W117 Waste liquid mercury (metallic) W119 Other inorganic liquid (specify in comments) Organic Liquids - Waste that is primarily organic and is highly fluid, with low inorganic solids content and low-to-moderate water content **Form Code Description** Code W200 Still bottoms in liquid form (fluid but not sludge) W202 Concentrated halogenated (e.g., chlorinated) solvent Concentrated non-halogenated (e.g., non-chlorinated) solvent W203
