

OREGON LIQUOR & CANNABIS COMMISSION

Supplemental Form: Electricity and Water Use Form

As part of the application process to obtain your Oregon Liquor & Cannabis Commission (OLCC) recreational marijuana Producer license or to renew your current Producer license, applicants under OAR [845-025-1030 \(3\)\(e\)](#) are required to submit a report or estimate of electrical and water usage. Applicants seeking a new Producer license may use this form to provide these estimates to the Commission.

Estimates should assume the business is in full production for each month.

How do I estimate my electrical usage?

Record your estimates in kilowatt-hours (kWh). To determine how many kWh a piece of equipment uses, take the following steps:

- Determine the wattage of the device by checking manufacturer specifications.
- Multiply this by the number of hours each month the device will be in use to determine watt-hours.
- Divide each month's watt-hours by 1,000 to determine kWh. Round to three decimal places.
- Repeat this for each piece of equipment and total the amounts for each month.

You may also use the energy estimate worksheet provided by the Oregon Department of Energy. You can find the link to this worksheet at <https://energy.odeo.state.or.us/cannabis>.

How do I estimate my water usage?

Clearly identify the measurement unit you are using to estimate or report your water usage. If you are using multiple units, you may use additional columns to record that information. If you are using reclaimed water, identify that as a source.

All water used in the cultivation of recreational marijuana must come from sources that are legal under Oregon law, and which are documented and verifiable. If you are utilizing more sources of water than may be included on this form, you may include that information on additional files uploaded into the online licensing system.

Renewal Requirements for Existing Producer Licensees

As part of your annual renewal application, you are required under OAR [845-025-1030 \(3\)\(e\)](#) to submit the actual electricity and water monthly usage for the previous year, taking into account all portions of the premises. You may use this form to submit to the Commission your actual electricity and water usage.
